

TABLES DES MATIERES

J.-L. GARDIES, <i>Esquisse d'une théorie des prédicats complétifs</i>	3
H. FISHER, <i>Defensive learning: an introduction to a dynamic epistemology</i>	31
G. PLANAVERGE, <i>Déduction et trivalence</i>	51
J. XENAKIS, <i>Natural deduction «puzzle»</i>	59
J. LAXE, <i>On the addition of classes to set theories</i>	61
P. MULLOCK, <i>The Stone -Tammelo deontic logic</i>	65
J.M. ORENDUFF, <i>A partially truth-functional modal calculus</i>	91
D. WALTON, <i>Modal logic and agency</i>	103
G. WEAVER, <i>Tarski-Vaught and Löwenheim-Skolem numbers</i>	103
F. VANDAMME, <i>Presupposition or assertion ?</i>	127
C. LAMBROS, <i>Notes toward an axiomatization of recklessness</i>	133
A. PHALET, <i>The problem of the formalization of «nearly all»</i>	143
M. BYRD, <i>On incoherent quantification in languages without constants</i>	155
D. HADGOPOULOS, <i>A note on Aristotle's notions of universality and necessity</i>	131
V. RICHEY, <i>On creative definitions in the Principia Mathematica</i>	175
W. PATRYAS, <i>Concretization and entailment</i>	183
J.-L. GARDIES, <i>A propos de l'article de G. Kalinowski sur un nouveau système de logique déontique</i>	189
J. COHEN, <i>A reply to T.M. Simpson</i>	209
F. VANDAMME, <i>Synthesis, Realism and Causality</i>	215

TABLE DES MATIERES

S. SHELAH, <i>The lazy model-theoretician's guide to stability</i>	241
H. SIMMONS, <i>Counting countable e.c. structures</i>	309
D. ANDLER, <i>Finite-dimensional models of categorical semi-minimal theories</i>	359
G. CHERLIN, <i>Ideals in some nonstandard Dedekind rings</i> .	379
U. FELGNER, <i>On $\aleph_0$-categorical extra-special p-groups</i> .	407
W. HODGES, <i>A normal form for algebraic constructions II.</i>	429
D. LASCAR, <i>Définissabilité dans les théories stables</i> . .	489
<i>Australian association for logic</i>	509
<i>Les activités du Centre National de Recherches de logiques en 1975</i>	511
